

## **Comp 170 Custom App Progress Report**

Reminder: see the Custom Project Assignment for details on what you need to be sure to have in your project, including coding style, technical requirements, etc.

This is an informal and brief report. If a team project, one person, the one with report responsibility, turn in for the team. If an individual project, YOU do it yourself!

See the text 18.9.7 for further ideas and suggestions..

Cover these points:

1. Project title. Team members and roles if applicable.
2. Your current assessment of where you are on the schedule. Will you get done on time?
3. Your Analysis of your work so far
  - a. Big accomplishments so far (or since last report)
  - b. Big problems (technical or people)
  - c. Give a percentage number of how far you are to completion (e.g. 80% complete).  
Completion means you are all done, the code is clean and tested, and everything works!
4. Anything else you want to cover
