

COMP 125

Visual Information Processing with Google App Inventor

Dr. William L. Honig
Loyola University Chicago

Lab: Mole Mash Starter

Overview

From the text, Chp3, but only through pg 45, "Calling Mole Move every second". Turn in this part in this Bb assignment.

Pg 45 includes Figure 3-7 and you need to do the work up to the text right after the figure. This text is

If that's too fast or slow for you, you can change Clock1's TimeInterval property in the Component Designer to make it move more or less frequently.

What you need to do

Do only the part of the lab indicated above. No points if you do the full app. You must stop at the point indicated above. Follow along in the text up to that point.

See these instructions on how to submit your App Inventor Apps.
